7 March

Cloudiness with rain will spread to almost all sections, with the exception of the Vojvodina and northern Serbia, where considerable cloudiness is expected in the evening. Moderate southeasterly winds; strong south winds in the Primorje; moderate east winds in the Danube and Morava Valleys. Considerable rise in temperature.

10 March

Variable cloudiness, with occasional rain in southern and southeastern sections; moderate snow and rain in northwestern sections. Southerly winds in northern sections. Moderately stormy in the Primorje. Moderate south winds will continue in other sections. A moderate drop in temperature is expected only in northern sections.

11 March

Report: Mostly cloudy in Slovenia, the Vojvodina, and eastern Serbia. Occasional light rain only in the upper part of the Morava River, with light to moderate cloudiness in other sections. Variable winds; south winds in the Primorje. Temperature at 1000 hours was about 3 degrees in northern sections, about 12 degrees in the Primorje, and about 8 degrees in other sections.

12 March

Moderately cloudy in eastern and southeastern sections; extremely cloudy in other sections. Heavy rains in the Primorje and northwestern sections, gradually spreading to the interior. Extremely heavy rains will fall on the western slopes of the Dinaric Mountains. Moderate south winds; east winds in the Danube Valley; and strong south winds in the Primorje. Considerable rise in temperature.

13 March

Cloudy with rain, except in southern Serbia and Macedonia, where it will be extremely cloudy without rain. Moderate southeast winds. No change in temperature.

14 March

Cloudy with rain in northwestern sections and along the coast. Slightly cloudy in southern Serbia and Macedonia; moderate cloudiness in other sections. Light to moderate southeast winds. Temperature will remain high.

15 March

Variable winds with moderate west winds and a slight drop in temperature will follow bad weather in the north. Mostly clear in other sections.

17 March

Mostly clear; light variable cloudiness during the day. Light winds. Temperature remains high.

18 March

Generally moderate cloudiness, with very light occasional rain in northwestern sections. Light humidity in other sections. Moderate winds in northwestern sections, occasionally stronger in southern and western Srem. Temperature will rise.

19 March

Cloudiness, with occasional rain in northwestern sections, gradually spreading towards the east. Slight cloudiness will remain in southern Serbia and Macedonia. Moderate winds. Temperature will fall slightly in northwestern and northern sections.

20 March

Extremely variable cloudiness and occasional light rain in western and northern sections. Moderate southerly and westerly winds. No change in temperature.

21 March

Cloudiness with occasional rain in eastern Serbia and Macedonia, especially in the extreme east. Variable cloudiness in other sections. Moderate north winds. Temperature falling. Light frosts in northwestern and northern sections.

22 March

Mostly clear during the night; light to moderate cloudiness during the day. Light northerly and easterly winds. Light frost in the morning, temperature minus 3 degrees; rise in temperature during the day.

24 March

Moderately cloudy in Slovenia, Croatia, and the Vojvodina; clear, or very slight cloudiness in other sections. Moderate southwesterly and westerly winds. Great rise in temperature.

25 March

Bad weather will prevail in the northwest during the night, spreading in the morning to the southeast. Heavy rains are expected in northwestern sections and along the coast, where there will be occasional thunder. Moderate to strong winds, changing to a northerly direction. Brief rise in temperature, followed by moderate coolness without frost.

26 March

Cloudy with rain. Mostly moderate northerly winds; stormy in the Primorje. Temperature falling to 0 degrees.

27 March

Clearing in the northwest, spreading quickly to eastern sections. Mostly northerly light winds, gradually changing to southerly. Morning temperature will be about 0 degrees, rising greatly during the day.
